Support and enhancement of inventory execution under SAP®

Regardless of whether it is an annual inventory, a permanent inventory, an inventory sampling or a dynamic cycle counting, the FlexMobile inventory solution supports you throughout and leads to a fast, cost-effective and transparent inventory execution in SAP.

The FlexMobile inventory solution supports you on inventory management level (SAP MM-IM) as well as on warehouse management level (SAP WM and EWM). You have a variety of options to combine the individual inventory phases consisting of inventory preparation, inventory count and counting of inventory differences and to perform them in one step. The documents are generated, managed and assigned paperlessly.

Efficient and transparent

The inventory process under SAP is extended by the online use of mobile data terminals and a clear inventory control and evaluation tool. You are able to carry out your inventory on the move using barcode entry.

This makes inventory preparation, execution and control much more efficient, transparent and avoids operating errors.

Flexibel und erweiterbar

The Flexus framework supports both ITSMobile and SAP Fiori, ensuring flexible choice of mobile data collection devices, smartphones and tablets.

The FlexMobile inventory solution is extendable with a signature function for counters and recorders, where the signature is digitally recorded directly in SAP.

FlexMobile inventory solution at a glance

- > FlexMobile Online Inventory for SAP WM / MM-IM / EWM
- > Supported SAP inventory processes:
 - Inventory as of reporting date
 - permanent inventory
