Optimize processes with mobile scanner applications

The FlexMobile series supports you in optimizing logistics processes. Mobile applications accelerate processes and increase efficiency.

Mobile SAP® applications for all logistics processes

Based on many years of experience in the field of mobile SAP® solutions, Flexus offers a variety of mobile transactions for all logistics processes. From goods receipt, warehouse, production to shipping, the crucial SAP® logistics functions can be designed more efficiently with mobile applications. Technology, process and physical environment have to match - we offer the complete solution and help you to find the right solution for your application.

Accelerate processes - increase efficiency

By using mobile SAP® solutions, process flows along the complete supply chain are made more efficient. With FlexMobile, bookings are made directly at the point of action and process time and error captures are significantly reduced.

The Flexus modular system

The Flexus development framework resembles a construction kit for the flexible and rapid realization of technological and business solutions and functionalities.
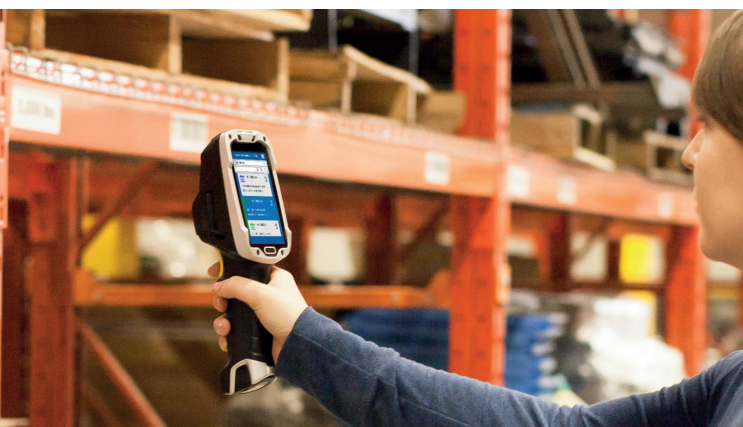

Through the modular use of all available applications, individual requirements can also be mapped and subsequent expandability is always guaranteed. The FlexMobile solutions can be used on a site-specific or group-wide basis.

Technologies for connecting mobile devices

> SAP Fiori and UI5-Design

> ITSMobile (HTML and ABAP)

> JMobileClient (Flexus application)

> Offline-Technology

Special industry solutions

The modular architecture of our mobile solutions means that special requirements can also be met. In addition, we provide special industry solutions.

Mobile Apps for SAP

Your advantages of the FlexMobile solution

> Full integration with SAP

> Over 200 standard solutions available

> Use of different end devices possible

> Intuitively designed user interface with photo function and signature capture

> Reduction of manual processes to a minimum through the use of barcode / RFID technology

> Reduction of input errors

> Use as a site or corporate solution

> Display images and documents

> TheFlex Mobile Browser for SAP for Android and iOS

Flexible hardware

The mobile solutions can be used on various end devices (handheld, forklift terminal, tablet, etc.) and thus offer many possible applications.

Connection to the SAP® system via proven radio technologies

The mobile data collection devices are connected directly to the SAP® system via radio technologies such as WLAN, GPRS or UMTS without middleware.

Data is transferred in real time via the online network. Updates take place directly in the SAP® system without any time delay. Offline solutions are used for special application scenarios without a network connection.

Application areas - over 200 templates available

Mobile warehouse processes SAP MM, WM, EWM

Mobile Inventory SAP IM, WM, EWM

Mobile Shipping logistics

Mobile operating data, Kanban

Mobile container management

Mobile quality management

Reporting and advanced apps

Signatures capture

Flexible bump label printing

Photo documentation
