flexible und automated packing table solution

> directly in SAP®

Simplify and optimize your SAP® shipping processes

If the number of parcel shipments increases, the shipping processes must be seamlessly coordinated. The Flexus packing table application supports the mapping of physical processes in SAP®. This ensures the selection of the required packaging material, the formation of handling units („HUs“) and the provision of the required labels via SAP®. With the Flexus SAP Add-On, the employees in the shipping department are relieved and the output rate is increased tremendously.

Reliable shipping processes

With the packing table solution for SAP®, employees in the shipping process are guided through the individual work steps such as packing, weighing and label printing via an intuitive packing dialog directly in SAP®.

This greatly simplifies the process and guarantees a short training time. The Flexus packing table solution for SAP® enables the handling of all relevant packing table functions in a single application. The progress in the packaging process is always directly visible. The solution also makes it possible to control label printing for CEP service providers such as DPD or DHL directly from SAP®.

The employees in the shipping process can physically pack the picked materials in the packaging material at the packing table in the warehouse and then directly transfer them to the Flexus Packing Table in the SAP® system. The entries are made via a permanently installed scanner. In addition, the weight can be transmitted directly to the SAP® system via scale integration, for example.

Integration of different types of scales

Another focal point of the packing table solution is the connection of different types of scales to the packing table for automatic weighing and closing of the required packages. The weight is automatically checked and recorded for the shipping order.

Integration of CEP service providers directly into SAP®

The shipping service providers are determined on the basis of weight data, packaging material and shipping location. Direct label printing takes place when the packages are completed. There is no need to enter data in a separate software of the respective service provider. The connection of the most relevant parcel service providers (DHL, DPD, ...) is directly possible with the packing table application.

Benefits of Flexus Packing table solution

- > Intuitive user interface for SAP® shipping processes
- > Reduction of the error rate
- > All necessary functions in one application
- > Optimized and automated dispatch processing
- > Note texts during packing
- > Direct connection of the scales
- > Label printing for CEP service providers
- > Audio output of error and info messages

Technologies for connection

- > SAP Fiori and UI5-Design
- > Printer connection (e.g. via Nice Label, OPAL label management)
- > Connection to scales (e.g. Bizerba, Mettler Toledo)

All functions in one application

- > Creation and packing of packages
- > Automatic scale connection to SAP®
- > Control of packing lines
- > Automatic print control for package labels
- > Automatic print control of stickers for shipping dangerous goods (e.g. UN numbers)
- > Parameterizable sound output for the user

Customer benefits through the introduction of Flexus Packing Table for SAP® at a glance

Users are guided through the individual work steps via an intuitive packing dialog. Using the packing table for SAP® makes the shipping process more efficient and reduces the error rate considerably.

- > Direct integration of the packing table into SAP®
- > Transparent process flow from warehouse logistics to the dispatch logistics
- > Simple posting of the packages directly on the terminal or Cockpit
- > Display and printout of specific labels
- > Voice output (self-definable)
- > Reduction of errors due to automated SAP processes
- > Simple entry of document data for shipping
- > Connection of different scales and printers
- > Full control over the correct package content

FLEXUS AG

YOUR PREMIUM SAP® INTRALOGISTICS PARTNER

If your company is looking for a partner who can help you with the digital transformation of your logistics processes, make the decision easy. We are there for you. Flexus AG advises and supports medium-sized companies and international corporations in the optimization of intralogistic processes in SAP.

As SAP partner company we are exactly the specialists when it comes to consulting and implementation of SAP logistics solutions. Benefit from our holistic consulting approach and our many years of experience in the integration of individual logistics solutions. In particular, we use the SAP add-ons of our 360° Logistics Suite©, which offer you the possibility to significantly streamline, simplify and thus noticeably optimize your material flow.

Together, we create a competitive logistics infrastructure that equips you for the future.

SAP® Certified
Integration with SAP S/4HANA®
